!!! ATTENTION !!!

A NEW COMMAND FOR COMMODORE 64/128 USERS

We've just introduced a new Sequence command for **Video Title Shop**: The **Sequence Loop**! The **Sequence Loop** is similar to **Play Current Show Page** (see {24} in your manual) and **Play Entire Title Sequence** (see {25} in your manual). Instead of playing a Sequence only once, Looping the Sequence causes it to play over and over again. This is great for in-store displays, trade-show demonstrations, etc.

To use **Sequence Loop**, hold down the Command Key and press Z (C Z). No other keystrokes are required. And like the other Sequence Tasks, you can start the **Sequence Loop** at any time (i.e., you don't have to be on a certain Page to use this command). The Loop continues without interruption until you press **RUN/STOP**.

NOTE: The **Sequence Loop** command plays the Sequence just the way you made it. For example, if a Show Page was created with a **Manual Advance** (requiring you to press RETURN before the Sequence continues), then Loop or no Loop, you'll still have to press RETURN for the Sequence to continue! Naturally, every time the Sequence Loops around to the **Manual Advance** Page, you'll have to press RETURN again. Solution? If you don't want to keep pressing RETURN, change or remove the **Manual Advance** Task! The Loop now plays without supervision.
